[The form *chemist* seems to be a shortening of alchemist (q.v.). The form chymist may be borrowed fr. Fr. chimiste. There is a tendency to call a vendor of drugs, &c., a chemist, and a scientific student a chymist. The spelling chemist best preserves the history of the word in English. The spelling chymist is more correct according to the ultimate derivation. The Arab. kīmiyā is fr. post-Classical Gk. χυμεία, which was, as well as ξήριον or ξηρον (see elixir), originally a name for the substance by which metals could be transmuted (the philosopher's stone), prob. derived fr. $\chi \bar{\nu}\mu \delta s$, = 'juice', though some would carry it back to a Coptic word. Gradually however al-kīmiyā came to be used metonymically for the science, the object of which was the discovery of the philosopher's stone. See Gildemeister (Z D M G, XXX. 534 ff.). The later Gk. forms $\chi\eta\mu i\alpha$, $\chi\eta\mu\epsilon i\alpha$ are fr. Arab. $k\bar{\epsilon}miy\bar{a}$.]

2. a cheat; in modern times spelt chouse. Gifford's note on the above quotation from Jonson tells us that in 1600 Sir Robert Shirley sent a chiaus, or agent from the Grand Signior and the Sophy, to England, who cheated the Turkish and Persian merchants of £4000, adding that two other chiauses arrived in 1618, 1625. One of the above quotations proves his accuracy as to 1618. Perhaps, however, the particular fraud had little to do with the modern use of the word. As Jonson suggests, chiaus may have been used for 'Turk' in the sense of 'cheat', just as Cataian stood for 'thief' or 'rogue'.

*coach, coche, sb.: Eng. fr. Fr. coche.

1. any kind of wheeled vehicle for state purposes, or private use, earlier called 'chariot', or 'charet(te)', esp. a closed vehicle with four wheels, originally used by the wealthy; said to have been introduced in the reign of Queen Elizabeth, according to Taylor the Water Poet, by her coachman, in 1564. Taylor says "for indeed a Coach was a strange monster in those dayes, and the sight of them put both horse and man into amazement: some said it was a great Crabshell brought out of China, and some imagin'd it to be one of the Pagan Temples, in which the Canibals adored the divell: but at last those doubts were cleared, and Coachmaking became a substantiall Trade" (Wks., sig. Bbb 2 vo/1). Southey (Comm. pl. Bk., 1st Ser., p. 431/2, 1849), however, tells us that, according to Fynes Moryson, coaches were rare about 1540, and so Taylor himself, both probably speaking of wheeled vehicles for private use, rather than the special kind to which the above quot. refers. According to Johnson a coach is "distinguished from a chariot by having seats fronting each other". Hackney-coaches which plied for hire, introduced about the middle of 17 c., were the forerunners of the modern four-wheeled cab.

2. the scheme or subject (of a literary composition).

1651 a Sonnet...whereof the complot...had as much of the Hermit as of the Poet: Reliq Wotton, p. 165 (1685).

[The derivation of Fr. complet is doubtful; according to Diez, fr. Lat. complicitum. The Eng. word plot,='conspiracy', has been regarded as an abbrev. fr. complot, but is found 1579 in Fenton's Guiciardini, a few years earlier than the earliest Eng. use of *complot* hitherto recorded in a dictionary. The Eng. plot, = 'a patch of ground', came to mean 'plan' (cf. Cotgr., Plateforme). The change of meaning of Eng. plot from 'ground-plan' to 'scheme' is exactly analogous to the change in Eng. of plan from "ground-plat of a building" (Cotgr.) to 'scheme'. It seems therefore a mistake to separate plot,='conspiracy', from Eng. plot, plat, = 'plan'.

compluvium, pl. compluvia, sb.: Lat.: a quadrangular opening in the middle of the roof of the atrium in a Roman house, towards which the roof sloped on each side, so that the rain which fell on the roof flowed into a tank called impluvium, beneath the opening.

1740 This then may, I think, be numbered among what the mathematicians called data, that is, confessed and granted truths: Delany, David, I. 81. [T.]
1767 I have neither data nor postulata enough to reason upon: Lord Chesters, Vol II. No. 186, p. 521 (1774). 1776 the author begs leave to assure the connecent; that he has not proceeded in his enquiries without sufficient data: J. Collier, Mus. Traw., p. vii. 1803 all our data must be obtained from our own mental operations: Stewart, Life of T. Read, Wks. p. 19/1 (1840). 1806 He cast a quick and penetrating glance over the facts and the data that were presented to him: Jeffreys, Essays, Vol. I. p. 141 (1844). 1809 Some of these data on which the lists which make the population of Austria amount to twenty-seven millions are founded, are truly riductious: Maty, Tr. Riesbeck's Traw. Germ., Let. xxxv. Pinkerton, Vol. vi. p. 124. 1818 To a mind so quick in its preceptions, so energetic in all its workings, slight data were sufficient to lead to a just result: Lanv Morgan, Fl. Macarthy, Vol. Iv. ch. i p. 9 (1819). 1821—2 The above was only one instance of his building too much on practical data. Hazlitt, Table-Talk, p. 77 (1885). 1826 in civilized countries, where experience has recorded many valuable data: Capt. dochmius, pl. dochmii, sb.: Lat. fr. Gk. δόχμως (ποὺς), 'slanting (foot)': a compound measure used in Greek lyric verse of which the normal type resembles an iambus followed by a cretic, ~-~~, but which presents nearly thirty varieties owing to resolution of the long syllables into two short syllables each, and the lengthening of the short syllables. It is explained as an iambic tripody with syncope of the middle iambic, or as a bacchius (~-~) followed by a catalectic trochee (a long syllable followed by a pause) and preceded by anacrusis. The latter explanation seems to be fashionable at present.

1880 Of the two dochmin which are usually conjoined in one verse, it is not necessary that each should finish with a whole word, but the words are often divided, and generally too so that they may terminate either in the first syllable of the second dochmins or the penultimate of the first: J. SEAGER, Tr. Hermann's Metres, Bk. II. ch. xxi. D. 55.

Dorian, Doric, pertaining to the Dores, Gk. Δωριεῖs, the name of one of the four great divisions of the Ancient Hellenes or Greeks who inhabited western and southern Peloponnese, and Corinth and Argos in the Classical age of Greece. The (α) Doric order of architecture is the simplest and most ancient of the great orders. The (b) Dorian mode in Music, was characterised in the diatonic genus by a scale formed of two disjunct tetrachords separated by a whole tone, the first interval of each tetrachord being a semitone. The pitch of this mode was medium and the tone severe. It gave the name to the first authentic church tones. The (c) Doric dialect is a group of Ancient Greek dialects distinguished by a comparatively broad vowel system and by the retention of palatal mutes and mutes generally. The term Doric has been applied to the dialects of the Scotch Lowlands and of the north of England.
